

Earthquake Safety

We live in an earthquake area.

When you feel the ground under your feet shake you are experiencing an earthquake.

You should...

**If you are outside,
drop to the ground.**

**If you are
inside, drop to
the floor.**

**Get under
something like
a table.**

**Hold on to the
object that you
are under.**

**Practicing what to do in an earthquake
will help you stay calm and take the right actions,
should you ever experience one.**
