

# My Medications

Sometimes, to stay healthy, your doctor will tell you that you need certain medications.

You have the right to know what these are, why they are being given to you, and how they will make you feel.

If you need help asking your doctor about medications that he or she says that you need, you can ask a member of your family, a friend,

or one of your support staff to help you.

If you are worried about how a medication is making you feel, make sure that you tell someone who can help you.
